

Dear Hiring Manager,

I am excited to apply for the **C# .NET Software Engineer** role at your Sri Lankan hub. As a final-year **BSc (Hons) Software Engineering** student at Cardiff Metropolitan University (UK) with hands-on experience in **C#, ASP.NET Core, MVC, and SQL Server**, I am eager to contribute to your innovative and collaborative team.

During my **Full Stack Web Developer Internship at Ceylon Electricity Board**, I developed full-stack applications, integrated third-party APIs for real-time GPS tracking, and collaborated closely with cross-functional teams to deliver high-quality modules. My work involved producing comprehensive technical documentation, participating in code reviews, and ensuring system reliability through structured testing. These experiences strengthened my proficiency in **C# development, database management, and full software development lifecycle practices**.

I have also completed several projects, including a **Resume Screening System** with ASP.NET Core MVC and SQL Server, where I implemented role-based authentication, keyword-based resume matching, and automated ranking. This project enhanced my understanding of application architecture, clean coding principles, and collaborative development.

I am particularly drawn to this opportunity because of your company's **hybrid work model, supportive culture, and focus on innovation**. I am committed not only to applying my technical skills but also to growing with the company and contributing meaningfully to global projects.

My résumé is attached below in the same PDF for your reference. I would welcome the opportunity to discuss how my experience and enthusiasm align with your team's goals.

Thank you for your time and consideration.

Yours sincerely,
Pramodya Warnakula

EXPERIENCE

Full Stack Web Developer Internship

Feb 2025 - Aug 2025

Ceylon Electricity Board, Sri Lanka, Kandy.

- Developed full-stack applications using C#, ASP.NET Core, MVC, and SQL Server.
- Integrated third-party APIs to fetch live GPS data and display vehicle locations on an interactive map.
- Collaborated with cross-functional teams to deliver modules within project deadlines.
- Participated in code reviews, debugging, and sprint planning.
- Produced comprehensive technical documentation using Typora and Docify.
- Improved system reliability through structured testing and issue resolution.

EDUCATION

CARDIFF METROPOLITAN UNIVERSITY – UK (Reading)

May 2026

BSC (HONS) SOFTWARE ENGINEERING

PUSHPADANA GIRLS' COLLEGE, KANDY

2022

ADVANCED LEVEL

LEXICON INTERNATIONAL SCHOOL, KANDY

2019

ORDINARY LEVEL

PROJECTS

Resume Screening System

- Resume Screening System built with ASP.NET Core MVC and SQL Server featuring role-based authentication, resume parsing, keyword-based matching, job posting management, and automated resume ranking.

Vehicle GPS Tracking System

- C# web app with third-party GPS API integration for real-time vehicle tracking and live map visualization.

Fingerprint Authentication System

- C# application integrating biometric SDK with Web API for real-time fingerprint capture and validation.

Travel Agency Website

- PHP & MySQL-based booking site with secure payments, user reviews, and admin package management.

Restaurant Management Website

- PHP & MySQL-driven site with dynamic menus, reservations, reviews, and admin management.

Login & Billing Management System

- Java (JSP/Servlets, MySQL, Maven, Tomcat) role-based system with authentication, CRUD operations, invoice generation, design patterns, and JUnit-tested reliability.

TECHNICAL SKILLS

Programming Languages: C#, Java, PHP, JavaScript

Web Development:

- **Frontend:** HTML, CSS, Bootstrap, Angular
- **Backend:** ASP.NET Core / MVC (C#), PHP

Database & Backend Technologies: MySQL, Firebase, MongoDB

Tools & Technologies: Git/GitHub, Visual Studio, VS Code, Postman, Figma

Other Skills: REST APIs, OOP, MVC Architecture, Agile/Scrum (basic)

SOFT SKILLS

Leadership, Communication, Time Management, Problem Solving, Team Work, Confidence, Collaboration
